9. Page 17. TTY Maintenance - DCO & Chief OC-E detail more maintenance men to Wire Systems and consider establishment single section within PEB - Central Maintenance Section - all maintenance.

10. Page 17. T & I - Chief OC-E "immediate" - transfer on temporary basis if necessary - least 2 men to T & I to resume testing plus assignment 1 man full time to crystal lab ( page 109. )

11. Page 17. LAB - DCO & Chief OC-E reconsider putting Lab in new bldg. set up 3 to 4 high grade positions in Lab to prevent competing. *permanently*

12. Page 17. DCO & Chief OC-E consider reorganizing PEB - central maintenance section, consolidate RSS & FAS remaining.

13. Page 17. DCO & Chief OC-E consider centralizing fabrication & modification work (FAS, WSS, T & I, Lab all in now ) ( move to [redacted] such as crystal). 25X1A6a

14. Page 18. Chief OC-E provide D/CO & DD/S specific & detailed case history showing lack of support & difficulties with OL so resolution benefitting Agency will result ( delays, errors, stock control & cataloging, interference with OC prerogatives in contract work. 25X1A6a

25X1A6a 24. Page 21. [redacted] - Personnel, Finance & Supply functions be consolidated into one Admin Staff, functional elements as now, be eliminated Chief, Admin GS-14, after looking at other jobs [redacted] be set up and DD/S be requested fill on DD/S career basis.

25X1A6a 38. Page 23. Excess Equipment - D/CO organize teams of technical personnel from [redacted] to test obsolete & excess equipment stockpiled so disposal can be accomplished speedily (IG says team should be given high priority even at expense some supplementary activity.)

Notes from Text IG Report

Page 105 - 119 - OC-E - Summary Page 115 - highly effective.

106 - PEB deficiencies - (a) personnel for Wire, (b) Split of maintenance functions.

108 - Error - should show Library as 4th part of MSB

109 - MSB deficiency - personnel shortage T & I.

(How can Chief OC-E beef up Wire and T & I from within?)

112 - R & D Board also includes Chief OC-S

113 - OC R. D. & P Bd commendable procedure compared w/DD. P Mat Bd.

114 - IG urges R & D Lab be brought back in new bldg - problem of getting qualified personnel.

116-117 - Consider combining FAS & RSS less maintenance.

118 - ? Emphasis on lack of support from Logistics.

25X1A6a

[REDACTED] - Reserve fuel tank needed [REDACTED]

25X1A

25X1A6a

[REDACTED] - OC Supply system far more efficient than general Agency system.

Integrity of OC supply system should be preserved and it should not be amalgamated as pertains [REDACTED] with Logistic support system run by 25X1A

25X1A6a
